

## CS102 SUMMER PROJECT INDIVIDUAL PROGRESS REPORT

June 10 - June 16: First week I met my groupmates for the first time. And I was filled in on the project topic. I was assigned with the functional part of the project which I'm more comfortable in and again met up few times to discuss furthermore.

June 17 - June 20: The presentation tasks were distributed the each of us and did the add a course page in the presentation.

June 24 - June 30: Met with the group for the requirements report and had the presentation in lab.

July 1 - July 7: The UI presentations were due this week and in this presentation I mainly focused on the add course page and also responsible for creating the FXML file using SceneBuilder. I also helped with the small mistakes in the presentation and helped making it better slightly.

July 8 - July 14: We met again and decided to use a new repository also did the JavaFx configuration which was quite challenging.

July 15 - July 21: In this week I did another interface page in SceneBuilder and uploaded as an FXML file.

July 22 - July 28: In this week there was the detailed design report draft and I helped with uploading screenshots, writing explanations to the screenshots, and also helped writing the method explanations.

July 29 - Aug 4: This week I couldn't really meet with my group mates because of a challenging personal issue and they were okay with it so I worked on my individual coding skills at home.
